Hi Jennifer

Here are the List 1 & List 2 chemicals. Of the 52 List 1 chemicals, there are inerts, Acetone and Isophrone.
List 2 here only contains the Pesticide Actives. Does not include the SDW chemicals – you need to go to the EDSP web page for the complete list

List 1 Chemicals

2,4-D	Diazinon	Glyphosate	Oxamyl
MGK-264	Dibutyl phthalate	Imidacloprid	PCNB (Quintozone)
Abamectin	Dichlobenil	Iprodione	Permethrin
Acephate	Dicofol	Isophorone	Phosmet
Acetone	Diethyl phthalate	Linuron	piperonyl butoxide
Atrazine	Dimethoate	Malathion	Propachlor
Benfluralin	Dimethyl phthalate	Metalaxyl	Propargite
Bifenthrin	ddi-sec-octyl phthalate	Methamidophos	Propiconazole
Butyl benzyl phthalate	Disulfoton	Methidathion	Propyzamide (pronamide)
Captan	Endosulfan	Methomyl	Pyriproxyfen
Carbaryl	EPTC	Methyl ethyl ketone	Resmethrin
Carbofuran	Esfenvalerate	Methyl Parathion	Simazine
Chlorothalonil	Ethoprop	Metolachlor	Tebuconazole
Chlorpyrifos	fenbutatin oxide/hexakis	Metribuzin	Toluene
Cyfluthrin	Flutolanil	Myclobutanil	Triadimefon
Cypermethrin	Folpet	Norflurazon	Trifluralin
DCPA	Tetrachlorvinphos	O- phenylphenol	

List 2 Chemicals

Acetochlor	Cyromazine	Glufosinate ammonium	Profenofos
Acrolein	Denatonium Saccharide	Hexythiazox	Propionic acid
Alachlor	Diclotophos	Isoxaben	Quinclorac
Aniline	Diuron	Lactofen	Quizalofop-P-ethyl
Bensulide	Endothall	Oxydemeton-methyl	Terbufos
Clethodim	Etofenprox	Oxyfluorfen	Thiophanate-methyl
Clofentezine	Fenoxaprop-P-ethyl	Paclobutrazol	Triflumizole
Clomazone	Flumetsulam	p-Dichlorobenzene	Trinexapac-ethyl
Coumaphos	Fomesafen sodium	Pentachlorophenol	TPTH
Cyanamide	Fosetyl-Al (Alette)	Picloram	Vinclozolin
			Xylene
			Ziram

Subject: Glyphosate CARC Final Draft EDITS 9.24.15

JR-

Okay, here is the current version of the draft CARC doc for glyphosate. I merged all the comments from Karlyn, Jessica, Lori, Dannelle, Anwar and me into this document. I addressed most of the comments and made all the editorial-like corrections, etc. I left some comment bubbles in the document which were either not addressed yet (need your input) or were informative—such as a few comments from Dannelle---- just so you would know why she changed a few things....those type of comments can be deleted after you read them. I don't know who else is going to submit comments. I'm sure ATM will say "at this moment, it looks good no comments" If others provide comments I will incorporate them into this version.

There is not a lot of work left to do on this:

1. Both Karlyn and Jessica both commented about the order in which the IARC info is presented in the exec summary/intro. I did not touch that and will let you decide if you like their suggestions or not. See their comments in the doc.
2. The glioma section is a bit messed up. The text doesn't quite match the table – some of the text is not in the table and some of the table is not in the text. Looks like part of it may have been deleted by mistake at one point. Let me know if you want me to work on that.
3. A few other minor comments here and there, but overall no probs so far.

Don't know if u r working at home or compressed. IF either, can u please do this for me Monday

I think it will be best that we have an official document for the ad hoc stats that you ran for this chemicals. So that we are transparent. You can prepare a Cover Memo and attach the 4 Tables and for each, you can give the bottom line.

1983 – Male Mouse – Renal tumors (you did yesterday) Accession No. 251007
1993 – Male Mouse – Hemangiosarcomas (Atkinson et al, 1993) MRID No. 49631702
2009 – Male Mouse – Lung adenocarcinoma and malignant lymphoma (Nufarm, 2009); no MRID No. Greim et al., 20015).
2001 – Male Rat – Liver adenomas (Syngenta 2001; MRID No. 49704601

Thanks

Glyphosate Team,

Attached is the most recent version of the RA with edits from Jess. I am including Anna as she wanted to add a few sentences to the hazard characterization as well.

That said, we need to send a final draft of the RA to ORD, Office of Children's Health, and Office of Policy no later than next Tuesday for their review. We need all the edits by Jess, the updated dietary numbers, the updated residential numbers, updated aggregate numbers, and any edits from Anna incorporated by COB Monday if at all possible so we can take one last quick look at it before we send it out Tuesday.

Please let me know if you need anything from me to make this happen but this needs to be our priority.

Thanks!

Jess and Jim --

Per the email chain below, would you please prepare a briefing for Jim on the EDSP List 1 WOE. Since the briefing is May 22, we would need to get the materials to Jim on May 21. That in turn means that you should get something for Jack and me to look at on May 20. Please let me know if you have any questions or comments.

Thanks,

Bill

Bill and Jack,

I am trying to determine the purpose of the EDSP meeting which is now scheduled for May 22nd. Looks like the purpose of the meeting is to provide a briefing on WOE's for List 2 ai 'a based on the email between Jim and Jack below. Is OPP preparing a briefing for this meeting on the 22nd?

Any light you can shed on this would be great!

Thanks

Dear Jess,
Regarding your enquiry and as already mentioned by Manuela, the message you received is automatically generated when we ask to all the experts belonging to (in this case) the Mammalian Toxicology section to update their Annual Declaration of Interest. Basically these messages are reminders for those experts attending Mammalian Toxicology meetings in the following days. Experts need to be invited to submit ADoIs but they are not compelled to do so. In your case you can choose to submit a new Declaration of Interest or you can ignore the message.

Please feel free to come back to me in case you need further information.

Kind regards
Maria

Bonjour Catherine,

We are indeed disappointed to hear this news; with your specialised exposure expertise, we had anticipated your being able to contribute meaningfully to the Section 1 discussions and drafts.

We do look forward to Jess Rowland's participation, but as this is most likely on a different topic discussed by different Subgroups, it would not replace the subject matter knowledge on exposure that you could contribute.

Is it possible that this decision may be reconsidered? If so, please don't hesitate if there is anything that we could provide in reaching a positive outcome.

Best regards,

Kate

Dear Catherine,

Please review the roles of each category of participant here: <http://monographs.iarc.fr/ENG/Preamble/currenta5participants0706.php>. I believe you and Jess Rowland will serve as Representatives:

(c) Representatives of national and international health agencies often attend meetings because their agencies sponsor the programme or are interested in the subject of a meeting. Representatives do not serve as meeting chair or subgroup chair, draft any part of a *Monograph*, or participate in the evaluations.

Because of your exposure expertise, you may wish to participate in Subgroup 1 discussions. Drafts covering the topics listed here: <http://monographs.iarc.fr/ENG/Preamble/currentb1exp0706.php> will be available the first day of the meeting. You may wish to review and comment on these in the Subgroup discussion. Additionally, if there's information you may be able to contribute on the agents being evaluated (see <http://monographs.iarc.fr/ENG/Meetings/vol112-listagents.pdf>) to aid understanding of past or current exposures in the US and worldwide, that would be most helpful. Such information may also be relevant during Plenary discussions.

Hope this helps but don't hesitate with further questions.

Best,
Kate

IARC, Lyon, France, 3-10 March 2015

Dear Dr Eiden,

In March 2015, the International Agency for Research on Cancer will convene a Working Group to develop Volume 112 of the *IARC Monographs* on the above-mentioned subject.

We have the pleasure of inviting you to attend the meeting as a Representative of your agency.

Further information can be found at <http://monographs.iarc.fr/ENG/Meetings/index.php>. The list of participants will be posted there a couple of months before the meeting.

Although we are not in a position to cover your travel and living expenses, we would be pleased to make a hotel reservation for you. We have reserved a block of rooms for the participants. **Attached are a description of the hotels and a hotel reservation form which we kindly ask you to return by 15 December 2014.**

All participants at meetings convened by the World Health Organization, of which IARC is a part, are asked to complete the attached Declaration of Interests. **If you plan to attend, please also return your completed and signed Declaration.**

Please feel free to call us (tel. Kate Guyton: +33-4-72.73.86.54; Kurt Straif: +33-4-72.73.85.07) if you have any suggestions or questions. We look forward to receiving your reservation form and Declaration (by email to monograph112@iarc.fr or by fax to +33-4-72.73.83.19) and to welcoming you to Lyon.

Yours sincerely,

Dear Meredith and Jess,

As promised, data fresh off the press....

The anthraquinone rabbit developmental study range-finder has just been completed at Argus (Charles River). As I anticipated, although the study was gavage, the rabbits showed reduced food consumption (in table below) which resulted in body weight loss in all treated groups. It is a repellent for rats and rabbits so it is difficult to make many conclusions concerning the adverse nature of the body weight loss. The rabbits in the high dose group lost a significant amount of weight and three aborted near the mid to end of study (day 18, 19 and 23) leaving us with only one litter in the high dose.

Doses evaluated were 10, 50, and 150 mg/kg, the same as the rat. We would suggest a high dose in the rabbit definitive of either 75 or 100 mg/kg while keeping the mid and low doses the same.

I have attached four graphs. Two are the maternal body weights for the rat and rabbit and two are the pup weights for the rat and rabbit. I did not assess the litter weights as the number of litters in the rabbit study were

so small but a visual inspection of the data indicated litters in the treated groups did show decreased weight consistent with the decreased individual pup weight.

Hi,

Here was the email I sent regarding the EFED literature searches that we spoke about. I am unsure if this got a task order for the contractor. I didn't attach the spreadsheets in the email as there are many and didn't know if it would crash the email, but rather placed them in the appropriate chemical folder in the EFED folder for the EDSP HED folder. If you need me to send them to you in batches, I can do that. Just let me know what I need to do to help move this along.

Thanks,
Amy

Hi,

Below are the chemicals that still need a review of the open literature articles that EFED retrieved using the USEPA ECOTOX database. I placed all the spreadsheets on the HED drive under the EFED folder, under ECOTOX folder.

They are arranged by PC code, with a spreadsheet for the aquatic studies and one for the terrestrial studies.

For some terrestrial searches, there is a PDF file of the results instead of an excel spreadsheet as the database was crashing when trying to download the excel files.

There are many columns in the spreadsheets, the one with the reference are "CF - CI". There is an EPA reference number in column CE. Ones that have 344 are from EFED's internal toxicity database (Part 158 data), so no need to be concerned about those ones.

So if the contractor can go through the references and flag any that look like they may be useful for the WOE that would be great.

Let me know if you have any questions.
Amy

Hi Jess,
(1) Attachment 1 has my notes on the two lymphoma mouse studies.
(2) Attachment 2 has the original CARC draft with some minor edits.

I could not figure out how to access more recent CARC draft on SharePoint. If you or Jessica can send this to me I will review and return asap.

Hi Charles

Sorry to nag you but can you send me your write up for the hemangiosarcomas of the Cheminova/Atkinson (Study #3) and the viral infection study #11.

We need to get this report out Monday....due to the Papal visit and Teleworking

Thanks

JR

That's late. Is that driven by the sap availability? For atrazine we are discussing options for Eco which may influence hh.

Are you ok with this schedule? Glyphosate is in July. Also, Human health
Atrazine is not on the list.

**Subject: Draft 2016 Science Review Meeting Schedule
(FIFRA SAP/CSAC) and Profile Sheet**

To All:

Please find attached the draft FIFRA SAP and CSAC schedule for calendar year 2016, and the Science Review Profile Sheet. The profile sheet should be completed and submitted to me approximately 4 – 5 months prior to the scheduled meeting date. If additions or deletions are needed to the draft schedule or if you have any questions, let me know.

Thanks,
Laura

Dear David,

Attached for your information is an EFSA response to the open letter by C. Portier on the review of the carcinogenicity of glyphosate by EFSA and BfR.

Please note that this letter is sent to you under embargo! It will be sent on 13 January 2016 to C. Portier and published on the EFSA website (around 11:00, CET)

Best wishes

Juliane
